

ICEM 2022 CAMERA-READY ABSTRACTS INSTRUCTIONS FOR AUTHORS

A. FirstAuthor¹, B. SecondAuthor¹ and C. ThirdAuthor²

¹ *Affiliation, e.g. Institute of Fundamental Technological Research, Warsaw, Poland*

² *Another affiliation, if required*

1. General

In order to ensure a high quality of the volume of abstracts the Authors are kindly asked to submit **extended two-page abstracts in English**, in a form suitable for photo-copying (*camera-ready*). The aim of such abstracts is firstly to advertise the topic considered in the paper and secondly to provide the readers with some detailed information. Please, describe briefly the area of interest, basic assumptions, method used and highlight the main results of the research. A list of basic references is recommended.

The Authors are encouraged to submit full-length papers optionally to:

- (1) Conference Proceedings before **May 1st, 2022** (for the submission of the manuscripts the following platform <https://icem2022.sciforum.net/> should be used)
- (2) Selected International Journals before **May 1st, 2022**: *Archives of Mechanics* or *Engineering Transactions* or *Journal of Theoretical and Applied Mechanics*. After a usual reviewing procedure the accepted papers will be published in special issues of the journals.

The extended two-page abstracts must reach the Organizing Committee **by January 15th, 2022**.

2. Paper size, margins and paper length

Please, use the standard A4 (210 × 297 mm) paper size. Allow 2 cm left and right margins and 2.5 cm top and bottom margins (use the typing area of 17 × 24.7 cm). Contributions longer than two pages or having bad presentation in terms of the English language or typing quality will not be included in the volume of abstracts.

3. Font size, spacing, title, headings

Times Roman fonts of 12 point size should be used throughout all the paper with single spacing between lines of text.

The title should be centered in all capital characters and bold face. Do not leave any additional space above the title. The title should be followed by Authors' names (bold-italic) and respective affiliations (italic). Leave 20 pt (about two empty lines) between the title and Authors' names and the same space between the affiliation (Institution, city, country) and the beginning of the text. In order to save space, the affiliation should not include the full address of your Institution, which will be given in a separate participant list.

The section headings (if used) should be left aligned with no indentation, set in bold face with extra space of 12 points above and 6 points below. The paragraphs should be left and right justified with 1-cm indentation of the first line. Page numbers must not be typed on the sheets.

4. Tables, figures and equations

Figures, tables and their captions should be centered and numbered.

Paper size	Paper length	Font size	Line spacing
A4 (210x297)	2 pages	12 pt	single

Table 1. Basic format specifications.

Leave 12 points above and below the figure/table. Please, avoid grey-scale images as they may not reproduce correctly.

Displayed equations should be left-aligned with 2 cm indentation. The equation numbers (if necessary) should be placed in brackets at the left margin with no indentation, e.g.:

$$(1) \quad y = x^2 + \frac{\ln x}{x}$$

Sufficient space (at least 6 pt) should be left above and below the equation.

5. Template

Template file for Microsoft Word formats can be downloaded from the conference site, <https://icem19.org/>.

6. References

Any references should be placed at the end of the paper and referenced in the paper through the number in square brackets, e.g. [1]. The format of sample book and journal references is given below.

- [1] S. Timoshenko and S. Woinowsky-Krieger (1991). *Theory of Plates and Shells*, 2nd ed. McGraw Hill, New York, 122–131.
- [2] O.C. Zienkiewicz and J.Z. Zhu (1987). A simple error estimator and adaptive procedure for practical engineering analysis, *Int. J. Num. Meth. Eng.*, **24**, 334–357.
