

19th INTERNATIONAL CONFERENCE ON EXPERIMENTAL MECHANICS

Kraków, Poland, July 5-9, 2020

CALL for Papers!

Special Session

Non-contact and Optical Dynamic Measurements

The special session will provide a forum for scientists and engineers to present research pertaining to Non-Contact and Optical Dynamic Measurements for transient and steady-state measurement and analysis. Research papers are invited that bring forth current experimental and theoretical issues associated with sensing, measurement, signal processing, and post processing. Topics of particular interest include non-contact based measurements for: structural dynamics, modal analysis, impact, blast, and shock testing, structural health monitoring, transient and high-speed phenomenon, projectile tracking and dynamic orientation measurement, and commercial, electronic, aerospace, civil, wind energy, biological and mechanical systems.

Abstract Deadline: November 30, 2019

Abstract Submission : <https://icem19.org>
